PROFESSIONAL SEAL  
"To the best of our knowledge and belief the drainage of the surface waters will not be changed by the construction of this project or any part thereof, or that if such surface waters drainage will be changed, reasonable provisions have been made for the collection and diversion of such surface waters into public areas of drainage which the developer has a right to use, and that such surface waters will be placed off for its assistance with generally accepted engineering practices to all to reduce the likelihood of the damage to the adjoining property because of the construction of the project."
